1. Nature of Operations

Carpathian Gold Inc., together with its subsidiaries (collectively the "Corporation"), is an exploration and development company focused primarily on gold exploration and development of the Riacho dos Machados gold project in Brazil as well as gold and copper exploration on its property in Romania.

Carpathian Gold Inc. was incorporated under the laws of Canada on January 17, 2003 and is domiciled in Canada and its common shares are listed on the Toronto Stock Exchange ("TSX") trading under the symbol "CPN". The address of its registered office is 365 Bay Street, Suite 300, Toronto, Ontario.

2. Basis of Preparation and Going Concern

The Corporation prepares its condensed interim consolidated financial statements in accordance with IFRS as issued by the IASB applicable to the preparation of interim financial statements, including IAS 34, *Interim Financial Reporting*. These statements are condensed and do not include all of the information required for full annual financial statements and should be read in conjunction with the annual financial statements as at and for the year ended December 31, 2012.

These unaudited condensed interim consolidated financial statements have been prepared on a going concern basis, which contemplates the realization of assets and settlement of liabilities as they become due in the normal course of business for the foreseeable future. For the six months ended June 30, 2013, the Corporation earned net income \$73,099,520, reported an accumulated deficit of \$27,487,530, and has negative working capital of \$18,839,834 at June 30, 2013.

The Corporation has \$11,865,512 in cash and cash equivalents and \$11,500,000 of available funds from the Facility available to use as at June 30, 2013. These available funds may not be sufficient to fund the completion of Riacho dos Machados, the exploration in Romania, working capital requirements and corporate administration. The Corporation will need to secure the necessary financing to meet the Corporation's requirements for funding of construction operations and Facility repayments on an ongoing basis. Nevertheless, there is no assurance that these initiatives will be successful or sufficient. These circumstances lead to significant doubt as to the ability of the Corporation to meet its obligations as they become due and, accordingly, the ultimate appropriateness of use of the accounting principles applicable to a going concern.

These unaudited condensed interim consolidated financial statements do not reflect adjustments to the carrying value of assets and liabilities or reported expenses and balance sheet classifications that would be necessary if the going concern assumption was not appropriate. These adjustments could be material.

These condensed interim consolidated financial statements were approved by the Board of Directors on August 14, 2013.

3. Significant accounting policies

These unaudited condensed interim consolidated financial statements have been prepared following the same accounting principles and methods of application as disclosed in the Corporation's audited financial statements for the year ended December 31, 2012. These unaudited condensed interim consolidated financial statements should be read in conjunction with the Corporation's audited annual consolidated financial statements and the accompanying notes included in the 2012 Annual Report.

Principles of consolidation

The financial statements of the Corporation consolidate the accounts of Carpathian Gold Inc. and its subsidiaries. All intercompany transactions, balances and unrealized gains and losses from intercompany transactions are eliminated on consolidation.

Subsidiaries are those entities which Carpathian Gold Inc. controls by having the power to govern the financial and operating policies. The existence and effect of potential voting rights that are currently exercisable or convertible are considered when assessing whether Carpathian Gold Inc. controls another entity. Subsidiaries are fully consolidated from the date on which control is obtained by Carpathian Gold Inc. and are de-consolidated from the date that control ceases.

The Corporation's financial statements consolidate its subsidiaries which comprise the following:

| Name of entity | Country of incorporation | Ownership | |
|--|--------------------------|-----------|--|
| OLV Cooperatie U.A. | The Netherlands | 100% | |
| OLC Holdings B.V. | The Netherlands | 100% | |
| Mineração Riacho dos Machados Ltda. ("MRDM") | Brazil | 100% | |
| Ore-Leave (Brazil) Inc. | Barbados | 100% | |
| Ore-Leave Capital (Barbados) Limited | Barbados | 100% | |
| Carpat Gold S.R.L | Romania | 100% | |
| Carpathian Gold Limited | British Virgin Islands | 100% | |
| HUMEX Magyar-Angol Kutatasies Banyaszati Kft ("HUMEX Kft") | Hungary | 100% | |
| SAMAX Romania Limited | British Virgin Islands | 100% | |
| SAMAX Romania S.R.L. | Romania | 100% | |
| | | | |

Changes in accounting policies

IFRS 10, Consolidated Financial Statements replaces the guidance on control and consolidation in IAS 27 Consolidated and Separate Financial Statements, and SIC 12 Consolidation – Special Purpose Entities. IFRS 10 requires consolidation of an investee only if the investor possesses power over the investee, has exposure to variable returns from its involvement with the investee and has the ability to use its power over the investee to affects its returns. Detailed guidance is provided on applying the definition of control. The accounting requirements for consolidation have remained largely consistent with IAS 27. The Corporation assessed its consolidation conclusions on January 1, 2013 and determined that the adoption of IFRS 10 did not result in any change in the consolidation status of any of its subsidiaries and investees.

IFRS 11, *Joint Arrangements*, supersedes IAS 31, Interests in Joint Ventures, and requires joint arrangements to be classified either as joint operations or joint ventures depending on the contractual rights and obligations of each investor that jointly controls the arrangement. For joint operations, a corporation recognizes its share of assets, liabilities, revenues and expenses of the joint operation. An

investment in a joint venture is accounted for using the equity method as set out in IAS 28, Investments in Associates and Joint Ventures (amended in 2011). The other amendments to IAS 28 did not affect the Corporation. The Corporation has no joint arrangements and concluded that the adoption of IFRS 11 did not result in any changes in the accounting for joint arrangements.

IFRS 12, *Disclosure of Interests in Other Entities* requires a comprehensive disclosure standard to address the requirements for subsidiaries, joint arrangements and associates including the reporting entity's involvement with other entities. It also includes the requirements for unconsolidated structured entities (i.e. special purpose entities). The Corporation has assessed the disclosure of interests in other entities and concluded that the adoption of IFRS 12 did not result in any changes in disclosures.

IFRS 13, Fair value measurement, provides a single framework for measuring fair value. The measurement of the fair value of an asset or liability is based on assumptions that market participants would use when pricing the asset or liability under current market conditions, including assumptions about risk. The Corporation adopted IFRS 13 on January 1, 2013 on a prospective basis. The adoption of IFRS 13 did not require any adjustments to the valuation techniques used by the Corporation to measure fair value and did not result in any measurement adjustments as at January 1, 2013. The Corporation has assessed the disclosure of fair value measurement and concluded that the adoption of IFRS 13 did not result in any changes in disclosures.

IAS 1, Amendment, Presentation of Items of Other Comprehensive Income, requires the Corporation to group other comprehensive income items by those that will be reclassified subsequently to profit or loss and those that will not be reclassified. The Corporation has adopted the amendments to IAS1 effective January 1, 2013. These changes did not result in any adjustments to other comprehensive income or comprehensive income.

IFRIC 20, Stripping Costs in the Production Phase of a Surface Mine provides guidance on the accounting for the costs of stripping activity in the production phase of surface mining when two benefits accrue to the entity from the stripping activity: useable ore that can be used to produce inventory and improved access to further quantities of material that will be mined in future periods. The Corporation will assess the impact of adopting IFRIC 20 on the condensed interim consolidated financial statements on commencement of production.

New Accounting Standards

IFRS 9 - Financial Instruments

In November 2009, the IASB issued IFRS 9 - Financial Instruments as the first step in its project to replace IAS 39 Financial Instruments: Recognition and Measurement. IFRS 9 retains but simplifies the mixed measurement model and establishes two primary measurement categories for financial assets: amortized cost and fair value. The basis of classification depends on an entity's business model and the contractual cash flow of the financial asset.

Classification is made at the time the financial asset is initially recognized, namely when the entity becomes a party to the contractual provisions of the instrument. IFRS 9 amends some of the requirements of IFRS 7 - Financial Instruments: Disclosures, including added disclosures about investments in equity instruments measured at fair value in OCI, and guidance on financial liabilities and de-recognition of financial instruments. In December 2011, the IASB issued an amendment that adjusted the mandatory effective date of IFRS 9 from January 1, 2013 to January 1, 2015. The

Corporation is currently assessing the impact of adopting IFRS 9 on the consolidated financial statements.

4. Restricted Deposits

As at June 30, 2013 the Corporation's restricted deposits totaled \$868,269 (December 31, 2012 - \$1,282,168), representing currency held in US\$ in Brazil which will be available to fund the operations of MRDM once it is converted to Brazilian Reais through execution of an exchange contract.

| Directors, officers and employees | 11,092,000 | 3,831,942 | 0.58 | 3 years 47 days | 7,394,666 |
| Consultants | 600,000 | 82,888 | 0.58 | 46 days | 600,000 |
| Directors, officers and employees | 7,830,000 | 722,513 | 0.40 | 4 years 44 days | 2,610,000 |
| Consultants | 400,000 | 13,912 | 0.40 | 1 year 44 days | 300,000 |
| Officer and employee | 1,000,000 | 139,498 | 0.40 | 4 years 101 days | 333,333 |
| Balance at June 30, 2013 | 30,202,000 | 6,070,070 | | 2 years 262 days | 20,517,999 |

As at June 30, 2013 the number of stock options available for exercise was 20,517,999 at a weighted average exercise price of Cdn\$0.41 and the aggregate remaining unamortized value of unvested stock options granted was \$283,146.

Using the fair value method, total share-based compensation for stock options issued and outstanding for the three months ended June 30, 2013 was \$272,166 (June 30, 2012 - \$516,617), of which \$83,531 has been capitalized to exploration and development costs (June 30, 2012 - \$157,548). Total share-based compensation for stock options issued and outstanding for the six months ended June 30, 2013 was \$541,330 (June 30, 2012 - \$1,038,645), of which \$164,023 has been capitalized to exploration and development costs (June 30, 2012 - \$314,088).

(d) Common Share Purchase Warrants

The following table shows the continuity of warrants for the periods noted below:

| | Number of Warrants | Weighted Average Exercise Price Cdn\$ |
|--|--------------------------------------|--|
| Balance at December 31, 2011 Expired warrants Exercised by warrant holders | 8,377,717 (8,302,717) (75,000) | 0.33 0.33 0.33 |
| Balance at December 31, 2012 Issued on Finalization of Facility | 20,000,000 | - 0.40 |
| Balance at June 30, 2013 | 20,000,000 | 0.40 |

The fair value of the Common share purchase warrants was estimated at \$3,256,109 using the Black Scholes valuation model using the exercise price of Cdn\$0.40, expiry of January 11, 2016 and volatility of 65.0%.

9. Expense Breakdown

(a) General and administrative expenses

| g General and administrative expenses | Three-Month Period Ended June 30 | | Six-Month Period Ended June 30 | |

| | 2013 \$ | 2012 | 2013 \$ | 2012 \$ |
| Foreign exchange gain | 2013 | 2012 | | |
| Foreign exchange gain Interest income | 2013 \$ | 2012 \$ | \$ | \$ |
| | 2013 \$ (3,072,973) | 2012 \$ (2,032,786) | \$ (4,800,336) | \$ (556,183) |
| Interest income | 2013 \$ (3,072,973) | 2012 \$ (2,032,786) (162,005) | \$ (4,800,336) (187,856) | \$ (556,183) (421,403) |

10. Earnings (loss) per Share

Basic earnings/loss per share is calculated based on the weighted average number of Common Shares issued and outstanding during the period. Basic weighted average shares for the three and six months ended June 30, 2013 is 555,419,911 (June 30, 2012 – 555,013,043) and 555,419,911 (June 30, 2012 – 554,747,480), respectively. Diluted weighted average shares for the three and six months ended June 30, 2013 were 555,419,911 (June 30, 2012 – 556,613,233) and 555,419,911 which is calculated using the treasury stock method whereby proceeds deemed to be received on the exercise of options and warrants are applied to reacquire common shares. Stock options and warrants outstanding for the six months ended June 30, 2012 are considered anti-dilutive and therefore have been excluded from the calculation of diluted earnings per share for the six months ended June 30, 2012.

11. Deferred Share Units

Effective January 21, 2010, the Corporation established a Deferred Share Unit ("DSU") Plan for directors or officers of the Corporation or any affiliate thereof ("Eligible Person"). Under the DSU Plan, no less than one-third of bonuses awarded to management will be paid in DSUs and any future increases in directors' remuneration will be paid in DSUs. A DSU is a unit equivalent in value to one common share of the Corporation based on the five-day average trading price of the Corporation's common shares on the TSX immediately prior to the date on which the value of the DSU is

determined (the "Market Value"). Upon termination, an eligible person receives a cash payment equivalent to the Market Value of a common share on the termination date multiplied by the number of DSUs held by them.

The following transactions occurred during the periods noted below:

| | June 30, 2013 | - |
|--|--|--|
| Number of DSUs outstanding, beginning of per Granted to officers Granted to directors Redeemed (at market price of Cdn\$0.28) | riod 2,395,434 - - - | 1,816,007 513,145 277,016 (210,734) |
| Number of DSUs outstanding, end of period | 2,395,434 | 2,395,434 |
| Market Value, end of period | Cdn\$0.17 | Cdn\$0.31 |
| Liability, end of period | \$389,557 | \$745,118 |
| | Three-Month Period Ended June 30 2013 2012 | Six-Month Period Ended June 30 2013 2012 |
| Compensation (recovery) for the period | (256,569) (159,087) | (327,883) (177,205) |

12. Project Loan Facility

On January 11, 2013, the Corporation, through its wholly owned subsidiary, MRDM and Macquarie Bank signed a definitive agreement for a Project Loan Facility (the "Facility) with Macquarie bank Limited ("Macquarie Bank"). The Facility Agreement is a five year agreement with standard commercial terms as is customary in agreements of this nature. Subject only to interest breakage costs, the Corporation may repay the Facility at any time, with no adverse penalties. The Corporation has granted Macquarie Bank 20 million common share purchase warrants at an exercise price of Cdn\$0.40 per warrant for a period of three years. The fair value of these warrants was estimated at \$3,256,109 using a Black-Scholes model. In addition, the Corporation granted Macquarie Bank a call option on 10,000 ounces of gold exercisable at \$2,000 per ounce for a three year period from the date of commencement of operations (the "Gold Options"). The Gold Options had a fair value of \$1,400,000 liability on the date of grant (Note 16). Total cost of debt issuance amounted to \$7,097,513, which includes \$1.8 million fee to Macquarie and \$0.7 million of other costs and have been netted against the Facility balance. Accretion of these deferred financing costs were \$914,565 and \$1,112,032 for three and six months ended June 30, 2013, respectively.

The Corporation has drawn an aggregate of \$78.5 million against the Facility as follows:

| Draw down date | Tranche 1 | Tranche 2 | Total |
|------------------|------------|------------|------------|
| | | | |
| February 2, 2013 | - | 25,000,000 | 25,000,000 |
| March 20, 2013 | 10,000,000 | - | 10,000,000 |
| April 22, 2013 | 10,000,000 | - | 10,000,000 |
| May 31, 2013 | 7,500,000 | - | 7,500,000 |
| June 18, 2013 | 10,000,000 | - | 10,000,000 |
| June 19, 2013 | 16,000,000 | - | 16,000,000 |
| | | | |
| | 53,500,000 | 25,000,000 | 78,500,000 |
| | | | |

As at June 30, 2013, the principal balance outstanding on the Facility was \$78,500,000. Interest accrued during the three and six months ended June 30, 2013 were \$725,627 and \$975,311, respectively. Interest paid for both the three and six months ended June 30, 2013 were \$494,406. Commitment fees at 1.5% were \$296,417 for the six months ended June 30, 2013.

This Facility bears interest at LIBOR plus a margin of 5.5% for Tranche 2 and 5.0% for Tranche 1. These will be reduced to LIBOR plus 5.0% and 4.5%, respectively on commencement of production. After the Corporation has drawn the entire Facility, quarterly installments are repayable as per the following table. In addition, principal payments are required to be made from available cash in excess of the Corporation's requirements.

| | Repayment date | Tranche 1 | Tranche 2 | Total |
|------------|--------------------|------------|------------|---------------------------------------|

14. Related Parties

As at June 30, 2013 there were no amounts due to or from related parties (December 31, 2012 - \$Nil). During the three months ended March 31, 2012, the Corporation purchased graphic design and printing services from an entity in which, Dino Titaro, a director, President and Chief Executive Officer of the Corporation is a partner. There have been no other related party transactions since then.

15. Rehabilitation Provisions

The Corporation's rehabilitation provisions arise from its obligations to undertake site reclamation and remediation in connection with its mining activities. The following table summarizes the movements in the provisions:

| | June 30, 2013 | December 31, 2012 |
|---|-----------------------------|----------------------|
| Balance at beginning of period Provision Change in estimate | 2,965,613 - 1,445,234 | 2,965,613 - |
| | 4,410,847 | 2,965,613 |

As at June 30, 2013, the Corporation estimated the total undiscounted amount of the estimated cash flows required to settle the decommissioning and other rehabilitation obligations of the Corporation's Brazilian subsidiary to be approximately \$8,200,000 with the most significant expected outflows commencing in approximately 8.00 years. As at June 30, 2013 the rehabilitation provision has been discounted using a discount rate of 5.25%. The Corporation has recorded the rehabilitation provision based on the percentage of completion of the construction project as at June 30, 2013.

16. Derivative Contracts

Gold Stream Transaction

On May 20, 2010, the Corporation closed the gold stream transaction for \$30 million with Macquarie Bank for its Riacho dos Machados gold project (the "Project") in Brazil. Under the terms of the purchase and sale agreement (the "Agreement"), Macquarie will make upfront cash payments (the "Upfront Payments") totaling \$30 million in return for which it will have the right to purchase 12.5% of the gold produced from the Project at a price of \$400 per ounce of payable gold delivered ("Delivered Gold Ounce"). Based on the life of mine model (as determined from the Preliminary Economic Assessment ("PEA") previously released on August 12, 2009), the effective total proceeds per ounce to Carpathian per Delivered Gold Ounce will be approximately \$730. The price per Delivered Gold Ounce to Carpathian will be subject to an inflation escalator. Macquarie will also have the right to extend its participation to purchase 12.5% of the additional gold produced from any underground operation within the mining concession and five contiguous exploration licenses, as well as any open pit and/or underground operation on the balance of the property outside of the existing mining concession and five contiguous exploration licenses referred to above (the "Expanded Production"), by contributing 12.5% of the capital required to develop the Expanded Production and paying \$450 per Delivered Gold Ounce. This price per ounce will also be subject to adjustment by the price escalation and inflation factors described above.

The transaction has been recorded as a sale of a partial mineral property interest and the Upfront Payments are being accounted for as a recovery of exploration and development costs. Accordingly, no immediate gain or loss has been recognized on the transaction. As of December 31, 2012, the full \$30 million had been received as Upfront Payment.

In conjunction with the Project Loan Facility (Note 12), the Corporation through Macquarie Bank, also entered into price protection programs in the form of currency swaps for the Project's capital expenditures ("CAPEX") (R\$1.90 to US\$1.00) and estimated operating expenditures ("OPEX") (R\$1.983 to US\$1.00) as well as a gold price protection program comprised of 216,600 ounces of gold (approximately 26% of the open-pit reserves) at a price of \$1,600 per ounce. The fair value of the Gold Options granted to Macquarie Bank in 2013 (Note 12) was estimated at \$350,000 on June 30, 2013 and is included in the long-term derivative liability.

The CAPEX currency swap was arranged to mitigate the risk associated with fluctuations in the Brazilian Reais (R\$) during the mine construction period relative to the US\$. The notional amount of the CAPEX currency swaps that have not been settled by June 30, 2013 is R\$36,769,427. The OPEX currency swaps were arranged to cover R\$/US\$ currency fluctuations during the initial years of the mine operations for a notional amount of R\$383,999,998. The gold contracts were arranged to mitigate the risk of fluctuations in the price of gold and has a notional amount of \$346,560,000.

Derivatives arising from the currency swaps and gold contracts are intended to manage the Corporation's risk management objectives associated with changing market values, but they do not meet the strict hedge effectiveness criteria designated in a hedge accounting relationship. Accordingly, these derivatives have been classified as "non-hedge derivatives".

Summary of Derivatives at June 30, 2013

| | No | Fair Value \$ | | | |
|----------------------|------------------|-------------------------|-----------------|-------------|--------------|
| | Within 1 year | (\$) 2 to 3 years | 4 to 5 years | Total | |
| Currency contracts: | | | | | |

17. Financial Instruments and fair values

Measurement categories

Financial assets and liabilities have been classified into categories that determine their basis of measurement and, for items measured at fair value, whether changes in fair value are recognized in the statement of income or comprehensive income. The following table shows the carrying amounts and fair values of assets and liabilities for each of these categories at June 30, 2013 and December 31, 2012.

| 01, 2012. | June 30, 2 | | 0, 2013 | December 31, 2012 | |
|--|------------|-----------------|----------------------|--------------------|----------------------|
| | Level | Carrying amount | Estimated fair value | Carrying amount | Estimated fair value |
| Financial Assets | | | | | |
| Loans and receivables | | | | | |
| Cash and cash equivalents ¹ | | 11,865,512 | 11,865,512 | 18,956,650 | 18,956,650 |
| Restricted deposits ¹ | | 868,269 | 868,269 | 1,282,168 | 1,282,168 |
| Sundry Receivables ¹ | | 120,899 | 120,899 | 241,024 | 241,024 |
| Financial Liabilities | | | | | |
| Amortized cost | | | | | |
| Trade and other payables ¹ | | 18,193,657 | 18,193,657 | 7,786,814 | 7,786,814 |
| Project Loan Facility ³ | | 73,304,349 | 78,500,000 | - | - |
| Fair value through profit and loss | | | | | |
| Derivative contracts | 2 | 18,947,014 | 18,947,014 | 54,270,736 | 54,270,736 |
| Deferred Share Units ² | 1 | 389,557 | 389,557 | 745,118 | 745,118 |

¹ Fair value approximates the carrying amount due to the short-term nature.

Fair value hierarchy

The fair value hierarchy establishes three levels to classify inputs to valuation techniques used to measure fair value. Level 1 inputs are valued at quoted prices in active markets for identical assets or liabilities. Level 2 inputs are valued at quoted prices in markets that are not active, quoted prices for similar assets or liabilities in active markets, inputs other than quoted prices that are observable for the asset or liability or inputs that are derived principally from or corroborated by observable market data or other means. There are no Level 3 instruments.

18. Commitments

Lease Commitment

The Corporation has entered into a Sub-Lease Agreement from December 1, 2010 and expiring on March 31, 2018 for office space. The minimum annual rent is Cdn\$35,640 for the entire term of the sub-let plus applicable expenses.

As at June 30, 2013, the Corporation has finalized and signed contracts for the construction, development and operating activities in Brazil as follows:

² Based on market price of the Corporation's common shares at period end.

Fair value represents the face value of the loan facility.

| | Within 1 year | 2 to 3 years | 4 to 5 years | Total |
|-----------------------------------|------------------|-----------------|-----------------|------------|
| Construction and supply contracts | 35,427,120 | 621,111 | - | 36,048,231 |
| Office lease | 157,895 | 315,790 | 78,947 | 552,632 |
| Equipment lease | 878,222 | 439,111 | - | 1,317,333 |

In addition, the Corporation has signed agreements for services and supplies to be used during the operations of the Project, including for the supply of diesel fuel.

19. Capital Disclosures

The Corporation manages its capital structure, defined as shareholders' equity and cash and cash equivalents, to ensure sufficient funds are available to the Corporation to support the acquisition, exploration and development of mineral properties. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Corporation's management to sustain future development of the business. The Corporation has cash and cash equivalents held with large Canadian chartered banks.

The properties in which the Corporation currently has an interest are in the exploration or development stage and as such the Corporation is dependent on external financing to fund its activities. The Corporation will continue to assess new properties and continue to explore and develop existing properties if it feels there is sufficient geologic or economic potential and if it has adequate financial resources to do so.

In accordance with the terms of the Facility (Note 12), the Corporation is required to maintain certain covenants, most of which will become effective on commencement of production. As of June 30, 2013, the Corporation is in compliance with the covenants.

20. Financial Risk Factors

The Corporation's financial instruments are comprised of financial liabilities and financial assets. Financial liabilities include accounts payable, Project Facility and derivatives arising from its currency and price protection facilities. The Corporation's main financial assets are cash and cash equivalents, restricted deposits, derivative contracts and sundry receivables. The main risks that could adversely affect Carpathian's financial assets, liabilities or future cash flows are as follows:

(a) Credit Risk

The Corporation's credit risk is primarily attributable to cash and cash equivalents, restricted deposits and derivative assets on its various currency swap and gold contracts. Cash and cash equivalents consist of deposit accounts held at various Canadian chartered banks, from which management believes the risk of loss to be remote. For derivatives with a positive fair value, the Corporation is exposed to credit risk equal to the carrying value. The Corporation mitigates credit risk on these derivatives by entering into derivatives with high credit-quality counterparties and monitoring the financial condition of the counterparties on a regular basis.

(b) Liquidity Risk

The Corporation's approach to managing liquidity risk is to ensure that it will have sufficient funds to meet liabilities when due. As at June 30, 2013, the Corporation had cash and cash equivalents and restricted deposits totalling \$12,733,781 and \$11,500,000 undrawn funds from the Facility to settle current liabilities of \$46,810,211. Current liabilities consist of trade and other payables, Scheduled Facility repayments and fair value of derivative contracts that are predominantly due within three months to not later than a year. Commitments, consisting of construction contracts and supply contracts for fuel and other material are included in Note 18.

(c) Market Risk

Market risk is the risk that changes in market factors, such as interest rates, foreign exchange rates or commodity prices will affect the value of the Corporation's financial instruments. Management endeavours to mitigate market risk through the use of currency and gold derivatives.

(i) Interest rate risk

The Corporation's short term investments are comprised of guaranteed investment certificates that bear interest at fixed rates to maturity and interest bearing deposit accounts held at Canadian chartered banks. The Corporation also holds a portion of its funds in bank accounts that earn variable interest rates. The Corporation regularly monitors the investments it makes and is satisfied with the credit ratings of its banks. Interest rate fluctuations could also have a significant impact on the valuation of Carpathian's derivatives. The Corporation is also exposed to interest rate risk with regard to the Facility.

As of June 30, 2013, management estimates that if interest rates had changed by 0.5% the impact on investment income and net loss for the period would have been approximately \$46,229. In addition, if interest rates had changed by 0.5% the impact of the Facility interest and net loss for the period would have been approximately \$4,584.

(ii) Foreign currency risk

The Parent's functional currency is the Canadian dollar. The Corporation is affected by currency transaction and translation risk. The Corporation funds its European and Brazilian exploration and development activities using U.S. dollar currency converted from its Canadian dollar bank accounts. The Corporation's liabilities incurred in Canada are primarily payable in Canadian dollars. Liabilities incurred in Romania are settled in Romanian Lei or Euros and liabilities incurred in Brazil are settled in Brazilian Reais. As at June 30, 2013, the Corporation held cash and cash equivalents of \$7,845,441 in Brazilian Reais, \$1,400,279 in Canadian dollars and \$78,457 in various European currencies. Consequently, fluctuations in the U.S. dollar currency against these currencies directly affect the cost of our property, plant and equipment assets and operating expenditures for our various subsidiaries. Management closely monitors variations in the exchange rates of the currencies in which it transacts business. To further mitigate these inherent risks the Corporation has entered into certain currency swap arrangements effective December 15, 2011 covering a substantial portion of its CAPEX and OPEX on the RDM Project in Brazil.

As of June 30, 2013, excluding the effect fluctuations in the R\$/US\$ exchange rate would have on the valuation of its currency derivatives, management estimates that if foreign

exchange rates had changed by 1% against the U.S. dollar, the impact on net loss for the period would have been approximately \$49,589.

(iii) Commodity price risk

The Corporation is exposed to price risk with respect to commodity pricing primarily for gold and copper. The Corporation has entered into a gold price protection program to mitigate the downside risk of changes in the market price of gold (Note 16).

21. Prior Year Comparatives

Certain classification of comparative numbers have been changed to conform to those used in the current period.

22. Subsequent Event

During July 2013, the Corporation drew an additional \$11.5 million against the Facility.
